

# Self-Learning Notes

The following set of materials has been prepared in order for you to get a brief introduction to development with React Native.

The github repository for this tutorial can be found (here)  
[[https://github.com/pattharock/SELF\\_LEARNING\\_NOTES](https://github.com/pattharock/SELF_LEARNING_NOTES)]

Follow the notes in the order

1. Introduction/main.md - Intro to React Native & Expo. Also contains all the set up related details.
2. Core Components/main.md - A deep dive into Core Components in React Native.
3. Styling/main.md - A guide to styling in React Native.
4. Navigation/main.md - Information regarding implementing basic mobile application navigational paradigms with ReactNative.
5. Dogstagram - Phew! that was a lot of information, let's put it to use by building something useful. An instagram for dogs :)

Note that in each folder, 3 files namely main.md, main.pdf, and main.docx are present. The contents in each of these files is the same, you may refer to the notes in the file format of your choice.
